

## Research: Observation Log

Name: \_\_\_\_\_

Date: \_\_\_\_\_

So, if you finished your Invention Survey, you probably found out what kind of inventions people need, because people told you. But you probably also found out that sometimes people have trouble telling you what they need.

When that happens, you have to figure out what people need on your own. The best way to do that is by WATCHING people. Yeah, it seems kind of weird, but it's also a great way to see what inventions people use and what kind of things they COULD use.

So print out some copies of this Observation Log, and carry them around with you. Answer the questions while you observe people, then come back and enter your observations into the online form to get certified **DR FAD** pages for your **INVENTOR'S NOTEBOOK**.

Location: \_\_\_\_\_

Device: \_\_\_\_\_

**1.** What problems did people have with this device?

**2.** What did it do really well?

**3.** What could make it better?
